

Design **Fabrication** **Installation**

For over 30 years Elance Steel has been transforming raw steel into innovative structural steel solutions. We produce a superior product with a cost effective approach, partnering with our customers to ensure the project runs smoothly and all requirements are met.

Elance specializes in large trusses used in commercial, industrial, entertainment, athletic and institutional buildings, and is a supplier to the mining, water, forestry, power and oil and gas markets.

Our wide-ranging capabilities comprise the custom design, fabrication, and erection of structural steel, miscellaneous metals and light ornamental steel structures. Services that fall under these categories include design engineering, drafting, stainless steel and aluminum welding, mobile welding, assembly, erecting, indoor painting and loading, rolling, plasma cutting, shearing, breaking, robotic fabrication, drilling, saw work, and more.

Structural Steel: Anchor Bolts, Beams, Bracing, Canopies, Columns, Crane Rails, Deck Angle, Girts, Joist Supply, Monorails, Plate Work, Purlins, Roof Frames, Trusses.

Miscellaneous Steel: Bollards, Boot Scrapers, Brick Veneer Angle, Burglar Bars, Platforms, Grates, Handrails, Imbedded Plates, Ladders, Lintels, O.H. Door Frames, Pit Frames, Stairs.

Our projects include:

Commercial: Shaw Centre-Saskatoon (curved trusses 160'-0 long and 15'-0 deep), Credit Union Centre, TCU Place, Wal-Marts, Home Depots, Burger King and Wendy's Restaurants, Tim Horton's, Galaxy Cineplex Theatre, Casino Regina, Cold Lake Energy Centre and High School, Moose Jaw Sports Plex.

Industrial: Potash, diamond and uranium mining industries, oil/gas divisions, forestry, water system upgrades/ expansions and SaskPower projects.

Ornamental: Saskatoon River Landing Light Supports, CPR Bridge Stair, Bema Auto Sport curved staircase and various in-home spiral staircases.

Elance Steel provides a complete detailing, engineering and finishing package. We produce accurate and detailed shop drawings encompassing design compliance, fabrication and installation details. Designs and fabrication is an in-house service, which allows us to oversee each level of production. Before any product leaves our facility, each piece is identified, catalogued and transported to the site when it is scheduled to arrive. As needed, our versatile erecting crews are able to readily adapt to constantly changing work conditions, project changes and deadlines.

Elance team members possess both the desire and exceptional skills to reach the goal of complete customer satisfaction. We guarantee the completion of the project on budget and on schedule. Elance has proudly achieved ISO 9001 Certification.

We look forward to working with you.
